Profile

AI Engineer with a strong foundation in machine learning, deep learning, and applied statistics. Experienced in building, training, and evaluating predictive models and intelligent systems using Python. Proficient in data preprocessing, feature engineering, model optimization, and deploying AI-driven solutions. Skilled in translating real-world problems into scalable machine learning and deep learning models using modern frameworks and analytical techniques.

Education

Helwan University

Sep 2021 – Jul 2025

Bachelor of Computer Science and Statistics — GPA: 3.608 (B+)

Relevant Coursework

- | | | | |
|----------------------|------------------------|---------------------------|-----------------------|
| • Machine Learning | • Linear Algebra | • Data Structures | • NLP |
| • Deep Learning | • Optimization Methods | • Algorithms | • Pattern Recognition |
| • Neural Networks | • Statistical Modeling | • Artificial Intelligence | • Applied Machine |
| • Probability Theory | • Time Series Analysis | • Computer Vision | Learning |

Training Experience

NTI-Huawei Egyptian Talents Academy (ETA)

Nov 2025 – Jan 2026

Artificial Intelligence Training

- Developed machine learning and deep learning models using Python for real-world datasets.
- Applied feature engineering, model tuning, and performance evaluation techniques.
- Worked with supervised learning models including regression, classification, and neural networks.

Information Technology Institute (ITI)

Jul 2024 – Aug 2024

AI Engineer Intern

- Implemented machine learning pipelines including data preprocessing, model training, and validation.
- Built predictive models and analytical solutions using Scikit-learn and TensorFlow.
- Applied mathematical foundations of AI including linear algebra, probability, and optimization.

Central Agency for Public Mobilization and Statistics (CAPMAS)

Jun 2024 – Jul 2024

Data Analysis Intern

- Applied statistical analysis and data validation techniques on large-scale governmental datasets.
- Supported data-driven decision processes using SPSS and structured analytical methods.

Projects

Mathematical Equation Solving Chatbot (Graduation Project)

- Built an AI chatbot using Retrieval-Augmented Generation (RAG) to solve mathematical problems in real time.
- Integrated LLM reasoning with external knowledge retrieval and deployed an interactive interface using Streamlit.

Multilingual Statistical Machine Translation (NLP)

- Implemented IBM Model 1 for statistical machine translation across multiple languages.
- Applied text preprocessing and bilingual corpus alignment with probabilistic model evaluation.

Medical Image Classification using Deep Learning

- Developed CNN-based deep learning models with transfer learning (EfficientNet) for medical image classification.
- Achieved up to 95% accuracy using data augmentation, class balancing, and model fine-tuning with robust evaluation metrics.

Technical Skills

Programming: Python, SQL
ML & DL: Scikit-learn, TensorFlow, Keras, PyTorch
Data & Math: NumPy, Pandas, Probability, Linear Algebra, Statistics
Visualization: Matplotlib, Seaborn, Power BI
Tools: Git, GitHub, Jupyter, Google Colab

Certificates

Artificial Intelligence (AI) Engineer	2026
<i>NTI-Huawei Egyptian Talents Academy (ETA)</i>	<i>Certificate link</i>
Oracle Cloud Infrastructure 2025 Certified Generative AI Professional	2025
<i>ORACLE University</i>	<i>Certificate link</i>
AI Engineer	2024
<i>Information Technology Institute (ITI)</i>	<i>Certificate link</i>
Data Analysis Professional Track	2024
<i>The Central Agency for Public Mobilization and Statistics (CAPMAS)</i>	<i>Certificate link</i>
Software Engineering	2024
<i>National Research Center (NRC)</i>	<i>Certificate link</i>
