Summary

AI Engineer and Data Analyst with hands-on experience in Machine Learning, Deep Learning, NLP, and AI-powered systems development.

Led a Medical Image Classification project as Team Lead during NTI training as part of an Automated Hospital system using Deep Learning techniques.

Achieved strong performance despite limited dataset size, helping support faster medical decision-making and early disease detection.

Technical & Soft Skills

- **Technical Skills:** Python, SQL(MySQL), Machine Learning, Deep Learning, NLP, LLMs, RAG, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Streamlit, Git/GitHub, APIs, Vector Databases, Data Analysis, Prompt Engineering
- **Soft Skills:** Problem Solving, Communication, Teamwork, Analytical Thinking, Time Management, Adaptability, Leadership, Fast Learning, Presentation Skills

Training & Experience

NTI-Huawei Egyptian Talents Academy (ETA)

Nov 2025 – Jan 2026

Artificial Intelligence Training

- Led a Deep Learning-based Medical Image Classification project for Brain Tumor MRI, Skin Cancer ISIC, and Breast Ultrasound (BUSI) datasets using multiple imaging modalities.
- Built AI models for early cancer detection as part of an Automated Hospital system, supporting faster medical decision-making with strong performance despite limited data size.

Information Technology Institute (ITI)

Jul 2024 – Aug 2024

AI Engineer Intern

- Developed a Multilingual Statistical Machine Translation system using Python and NLTK with text preprocessing, cleaning, and translation pipelines.
- Built an interactive Streamlit application with reusable trained NLP models saved as .pkl files to enable efficient inference without retraining.

Projects

Mathematical Equation Solving Chatbot (Graduation Project)

- Built an AI chatbot using Retrieval-Augmented Generation (RAG) to solve mathematical problems in real time.
- Integrated LLM reasoning with external knowledge retrieval and deployed an interactive interface using Streamlit.

Medical Image Classification using Deep Learning

- Developed CNN-based deep learning models with transfer learning (EfficientNet) for medical image classification.
- Achieved a good accuracy using data augmentation, class balancing, and model fine-tuning with robust evaluation metrics.

Education

Helwan University : Faculty Of Science

Sep 2021 – Jul 2025

Bachelor of Computer Science and Statistics — GPA: 3.608 (B+)

Military Service

Status: Exempted (Final Exemption)
